**Re:** Approved Sealant List

### **APPROVED SEALANT LIST**

Citadel Architectural Products, Inc. manufactures a variety of exterior cladding systems for the commercial construction marketplace. **A key component in the installation of these systems is proper sealant selection and application.**

There are many factors that determine which sealants we recommend. Perhaps most important is the ability of the sealant to adhere to all components of the cladding system without requiring the use of a primer.

**Based upon our testing, we recommend and approve the following silicone sealants:**

- Tremco® Spectrem® 2
- NovaFlex® Metal Roof Sealant
- Dow Corning 756 Building Sealant™
- Dow Corning 795™
- Dow Corning 995™
- GE Silpruf Contractors™ N, SCS 1800 Series

**If you have any questions, please contact our technical department at (800) 446-8828 or via email at [info@citadelap.com](mailto:info@citadelap.com).**
